IVU AG: Provisional figures for 2017 Revenue and EBIT on course for new records

In fiscal year 2017, IVU Traffic Technologies AG returned to its successful path – and significantly exceeded its own targets. All key figures are the highest in the firm’s more-than-40-year history.

Revenue is expected to be around € 70 million, a year-on-year rise of nearly 20%, and gross profit will amount to around € 47 million, increasing by over 10% compared to 2016. This is partly due to early calls for material deliveries and licences from the framework agreements concluded in 2017.

EBIT will increase to around € 6 million and will thus be considerably higher than the record-breaking year 2015. The prospects for 2018 remain positive as well; we expect EBIT to be somewhat lower at € 4 million to € 5 million.

All figures are provisional and not yet audited. The final, audited results will be published in the 2017 Annual Report at www.ivu.de on 21 March 2018.
